### FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

Industry (a)	FTE (b)	
Water	6.3	1
Electric		2
Gas		3
Sewer		4

## WATER OPERATING REVENUES - SALES OF WATER

1. Where customer meters record cubic feet, multiply by 7.48 to obtain number of gallons.
2. Report estimated gallons for unmetered sales.
3. Sales to multiple dwelling buildings through a single meter serving 3 or more family units should be classified commercial.
4. Account 460, Unmetered Sales to General Customers - Gallons of Water Sold should not include in any way quantity of water, i.e. metered, or measured by tank or pool volume. The quantity should be estimated based on size of pipe, flow, foot of frontage, etc. Bulk water sales should be Account 460 if the quantity is estimated and should be Account 461 if metered or measured by volume. Water related to construction should be a measured sale of water (Account 461).
5. Report average no. of individually-metered accounts (meters). The amount reported should be the average meter count. E.g., if a hospital has 5 meters, a total of 5 meters should be reported on this schedule in Average No. of Meters column.

### Water Operation & Maintenance Expenses (Page W-05)

If Fuel or Power Purchased for Pumping (623), divided by the Total kWh Used for Pumping on the Source of Supply, Pumping and Purchased Water Statistics schedule, is less than 3 cents or greater than 12 cents, please explain.

Fuel or Power Purchased for Pumping (623) divided by the Total kWh Used for Pumping equals \$0.125 per kWh. Fuel or Power Purchased for Pumping in the current year contains \$5,156 of natural gas purchased for pumping. The remaining \$42,370 was paid for electricity. As such, the City paid \$0.111 per kWh. This is within the acceptable range of \$.03 to \$.12 per kWh.

For values that represent an increase or a decrease when compared to the previous year of greater than 15%, but not less \$10,000, please explain.

Pumping Labor Expense (623) increased in the current year by \$11,046 or 15.6%. This increase was the result of the additional need of labor to repair main breaks and other required pumping maintenance.

Transmission and Distribution Line Expense (662) and Maintenance of Hydrants (677) decrease by \$15,092 or 33.9% and \$11,455 or 61.3%, respectively in the current year. These decreases resulted partly from the fact additional labor hours were utilized by the main breaks and pumping maintenance needs. The utility department also had fewer available maintenance labor hours in the current year resulting from turnover in the department due to a retirement and one individual being limited due to an injury in the current year.

Maintenance of Distribution Reservoir and Standpipes (672) decreased in the current year \$10,713 or 1,965.7%. This decrease resulted from the completion of activities related to the closing of a reservoir in 2009. No similar activities were required in the current year. This resulted in a significant decrease in expenses.

**If Additions for Accounts OTHER than 316, 343, 345, 346 and 348 exceed \$100,000, please explain. If applicable, provide construction authorization.**

The additions to account 346 of \$123,853 was for the replacement of some meter accessories and additions of small meter parts during the year.

**If Adjustments for any account are nonzero, please explain.**

The adjustments to accounts #391.1, 397 and 397.1 represent the reclassification of some assets in the current year to allow for the proper application of the adoption of the PSC approved depreciation rates in the current year.

Adjustment to account #328 was made to correct the 2009 additions related to the flow control station costs

## WATER AUDIT AND OTHER STATISTICS

1. Report actual metered values where possible. If water uses are not metered, estimate values for each line based on best available information. Water entering distribution system must equal the sum of Sales (line 5), Authorized System Uses (line 12) and Water Losses (line 19). For assistance, see AWWWW M36 Manual - Water Audits and Loss Control Programs.
2. For Gallons used in the treatment process (line 3), estimate water used in production including filter backwash, pumps, and other utility uses before the point of entry to the distribution system.
3. For Gallons used for other system uses (line 11), report other unmetered water used for system operation and maintenance, water used for non-regulated sewer utility and all other unmetered usage that is known to occur and does not fall into one of the other categories listed under Water Usage.
4. For Gallons unknown/not accounted for, estimate the volume of water losses due to other real or apparent losses, including customer meter inaccuracies, data errors, and unknown volumes. Unknown/unaccounted for volumes should be minimized to the extent possible.
