

2008 property tax ranking for the four-county Milwaukee metro area

These are the **2008 tax rankings**, from highest to lowest, for the **four-county Milwaukee metro area** based on total property taxes for a home with a fair market value – not assessed value – of \$200,000, which is roughly the median value in the metro area. The property taxes are based on the total equalized tax rate of each municipality, making comparisons possible. In addition to taxes, property owners in some communities pay special charges for such services as garbage collection, utilities, sewer assessments and road maintenance. These figures represent tax bills sent in late 2008 that were due to be paid by Jan. 31.

Waukesha County

2007 RANK	2008 RANK	TAXING DISTRICTS	2008 TAXES ON A HOME WITH A FAIR MARKET VALUE OF \$200,000
1	1	Waukesha	\$3,545

Some definitions

Assessed value – The dollar value placed on a parcel of property by the local assessor's office, using recent neighboring sales, physical inspections and comparative conditions. This is used to determine how much is owed in property taxes.

Levy – The amount of taxes to be raised by a government body or other taxing district.

Equalized rate or estimated fair market value – An adjustment to assessed value by the Wisconsin Department of Revenue to approximate current market price. This is used to apportion tax levies among municipalities and distribute state shared revenues.

Assessed tax rate – The rate that appears on your tax bill; it is used to determine how much you pay.

Shared revenue – State-collected taxes distributed to local governments, often to relieve the property tax burden.

Tax rate – The result of dividing total taxes to be paid by total property value. It is usually expressed in tenths of a cent, or mills. A mill rate of 25, for instance, would mean a tax of \$25 on every \$1,000 of property value.
